Regarding claims 27-29, the prior art does not suggest providing a start time of a next operational cycle to each of the plurality of devices; computing an offset between each of the plurality of devices specific local times and system time; synchronizing each of the plurality of the device specific local times with the system time using the computed offset; and aligning the plurality of device specific local times with respect to each other so that the start time of the plurality of devices coincide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
